Lacrimal Syringing

Watery eyes can sometimes be caused by a blockage or narrowing of the tear ducts. Lacrimal syringing is a test and a treatment that helps us check if the drainage system is working properly.

How it Works

- A few drops of anaesthetic are placed in the eye
- We gently flush sterile saline through the tear duct
- This helps identify whether the duct is open or blocked
- The syringing should unblock most issues.

Pricing

• £90 – Consultation

•£100 per eye – Lacrimal Syringing

Omnigen – Advanced Treatment for Dry Eyes

Omnigen is a natural tissue made from the amniotic membrane.

In cases of moderate to severe dry eye disease, the surface of the eye can become damaged and inflamed. Omnigen acts as a biological dressing, helping the surface of the eye to:

- Heal and regenerate naturally
- Reduce inflammation and irritation
- Restore comfort and clarity
- Protects the eye and reduces the need for ongoing drops
- Enhances long-term eye surface health

Pricing

• £90 – Consultation

•£750 per eye

Understanding Dry Eye

Dry eye occurs when the eyes do not produce enough tears or when the tear film evaporates too quickly. Symptoms include dryness, grittiness, burning, watering, blurred vision, and discomfort.

Our Technology

Oculus Keratograph used to assess:

- Tear film stability
- Tear production
- Lipid layer quality
- Meibomian gland health

E-eye IPL Treatment

A light-based therapy to treat Meibomian Gland Dysfunction — one of the main causes of dry eye.

- Day 1: Consultation + 1st Session
  Day 15: 2nd Session
- Day 45: 3rd Session

- Optional Booster at 8 months

E-Eye IPL Treatment

Pricing for Dry Eye assessment and IPL treatment

- £90 – Initial Consultation
- £500 – E-Eye IPL Treatment (3 sessions)
- £75 – 8-Month Booster Session (this session is free of charge for our Gold eyecare plan members)

Punctal Plugs for Dry Eyes

Punctal plugs are tiny, biocompatible devices that are gently inserted into the tear ducts to help retain natural tears on the surface of the eyes.
By slowing tear drainage, they keep the eyes better lubricated, reduce dryness, and relieve irritation. The procedure is quick, safe, and reversible.

Punctal Plugs: £95 per eye
